

# Exchange Information

## Basic information for interested exchanges

### Basic Information

Coin Name	Electronic Gulden
Coin Symbol	EFL
Coin Website	<a href="https://e-gulden.org/">https://e-gulden.org/</a>
Github link	<a href="https://github.com/Electronic-Gulden-Foundation/egulden">https://github.com/Electronic-Gulden-Foundation/egulden</a>
Logo	<a href="https://github.com/Electronic-Gulden-Foundation/egulden/blob/master/src/qt/res/icons/bitcoin.png">https://github.com/Electronic-Gulden-Foundation/egulden/blob/master/src/qt/res/icons/bitcoin.png</a>
White paper Link	-
Blockchain Explorer	<a href="https://chainz.cryptoid.info/efl/">https://chainz.cryptoid.info/efl/</a>
Linux Wallet Link	<a href="https://github.com/Electronic-Gulden-Foundation/egulden/releases">https://github.com/Electronic-Gulden-Foundation/egulden/releases</a>
Country	Netherlands / Global

### Coin positioning

#### **How will your digital currency be utilized in our daily life? In what area will your product apply to?**

The Electronic Gulden aims to be the core digital currency of The Netherlands.

#### **What is the core value of your digital currency?**

The Electronic Gulden focuses on education and adoption in The Netherlands. It is fully open source. The Electronic Gulden is hardened against attacks that are inherent to a mining-minority community coin by the OERUShield. Risk of for instance double spend attacks is minimal.

### Team

#### **Please introduce the main founder of your project**

The main founders have released the Electronic Gulden and have distanced themselves from the project for various reasons. The Electronic Gulden Foundation has taken up the task of supporting the Electronic Gulden development and adoption.

The Electronic Gulden Foundation currently consists of:

Dennis Ruhe  
Gerrit Oerlemans

### **Please introduce the past of the technical team**

Dennis Ruhe

<https://www.linkedin.com/in/dennis-ruhe-56424a67/>

Gerrit Oerlemans

<https://www.linkedin.com/in/gerritoerlemans/>

### **Do you have an outside consultant? If yes, please explain briefly**

None official. Various private individuals and companies that are personally invested in the future of the Electronic Gulden regularly give us advice.

### **Are there any of your team members involved in other projects of digital currencies?**

No

## **Investors/Partners**

### **Do you have an investor or project partner? If so, please introduce**

The Electronic Gulden is free to use by anyone. There are various individuals and companies that have expressed interest in the Electronic Gulden. They are free to invest in the coin and build integrations.

## **Token/Coin**

### **Why would the value increase over time?**

We believe there will be demand for community coins for various reasons. First of all the Bitcoin blockchain does not need to be bloated by local transactions. It is too valuable and therefore expensive. If everyone in the world is to use Bitcoin the blockchain will fill up fast regardless of projects like Lightning. We choose to follow Bitcoin closely to remain compatible and interchangeable with Bitcoin.

Secondly there is no need for a community to bind themselves economically with the rest of the world. Bitcoin is quite volatile and events in for example China affect Bitcoin heavily and therefore the rest of the (Bitcoin) world.

Third we believe all communities have their own requirements as to what their currency should be able to do. Community coins enable local adaptations to protocols without the need to convince the rest of the world about a certain feature.

### **What is the current market cap of your digital currency?**

As this information is highly volatile we refer you to <https://coinmarketcap.com/currencies/e-gulden/>

### **Total premine hold**

<https://e-gulden.org/index.php/premine>

### **Which exchanges are your coin currently trading on?**

Bittrex

Cryptopia

Novaexchange

### **Please provide instructions on how to integrate your wallet**

The Electronic Gulden is fully compatible with Bitcoin. Running an e-Gulden wallet should be no different than a Bitcoin wallet.

## **Community**

### **Facebook Link**

<https://www.facebook.com/groups/EFLFoundation/>

<https://www.facebook.com/EFLFoundation/>

**Twitter Link**

<https://twitter.com/eguldenfoundati>

**How many people are there in your community?**

That is hard to say. There are over twice as much active EFL nodes as Bitcoin nodes in The Netherlands (resp. 1200 and 500). A lot of them belong to the so-called 'silent majority'.
